

SITEMASTER 200® Error: Connection Handle is Invalid

Symptom: You install the program and receive the message “Connection Handle is invalid” when trying to run SITEMASTER 200®.

Solution: Using the Control Panel (Vista, Windows7), select System and Maintenance, and then Administrative Tools. Select the Data Sources (ODBC) item, and under both the User DSN and System DSN tabs, remove the SM20030 drivers. Run Sitemaster.
