

Problem: You can't access the content in the SITEMASTER 200® Users Guide (Help Manual).

A security update for Windows XP® may block access to CHM files

Windows XP® security update blocks active content in CHM files to protect your system security.

Solution: Run Windows Explorer, right-click on the CHM file, and select Properties from the popup menu. Click on the Unblock button immediately below the Advanced button on the General page. Click Apply to show the content. Once the CHM file has been unblocked, the Unblock button disappears.
